

## THE **CARGO EXPRESS** ADVANTAGE

Innovation, durability and unequalled performance and just a few words our customers use to describe Cargo Express.

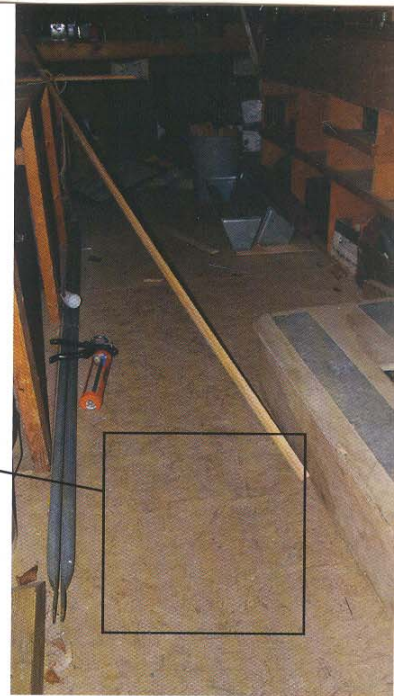

Our philosophy is simple. Start with high grade materials applied to well engineered design, add good people who pride themselves on their work and you end up with better product.

Superior Allowable Bending Strength ensures high strength on every floor.

### Is Advantech better?

Take a look at this original Advantech floor in a 7-year-old contractor trailer. Our Advantech floors perform year after year.

*"I am very pleased that I chose a Cargo Express trailer. I looked at several other trailers, but ultimately came back to the Cargo Express because of the quality-built construction." - William from Maryland*

## TAKE A LOOK **ON THE INSIDE**

All the tough stuff is on the inside. Quality tube steel framing and main frame construction, welded butt joints and a 20-year rated floor. The XL is built tough to weather your hauling needs.

- A. Tube Steel Roof Bows
- B. Welded Butt Joints
- C. Tube Steel Main Frame Construction
- D. Tube Steel Sidewall Studs
- E. Galvalume Roof
- F. Vapor Barrier
- G. Concealed Wiring
- H. Full Welded Wheel Well Seams
- I. Dexter Axles
- J. Full Tube door jamba
- K. Larger Sandpad standard

### Feel the Cargo Express Difference.

Here's an easy test.

Grab an open side door and test the twist strength of a Cargo Express door compared to the competitors. You can feel the quality difference for yourself. That difference translates to longer life and better dust and water protection for your valuable cargo.

Tube Steel Butt Welded for square, rigid connections for maximum 360 degree strength.
